I have graduated from college with a B.S in biological sciences. This fall, I will be entering medical school. I wanted to bring to your attention the following serious matter:

As a member of the Center for Science in the Public Interest (CPSI), I urge you to save human lives by banning the use of medically useful antibiotics in animal feed. Adding antibiotics to feed in order to promote the growth can make bacteria resistant to those antibiotics. And that can leave physicians with no way to treat life-threatening bacterial infections in humans. That's why I support the petition filed by CPSI.

Thank you for your attention.

Sincerely,
Rebecca Chan
